Subject: West Fertilizer company - RMP and Tier II

Hi Bob and Steve,

I know you guys have your hands full and I understand Bob, you are working on a White House request, but I was wondering about what other chemicals they have at the facility. The facility RMP states that it receives, stores, and distributes anhydrous ammonia for farmers and the RMP only discusses anhydrous ammonia. However, we are talking here and think the explosion may not have been from the anhydrous ammonia. Perhaps there were other fertilizers involved. I was hoping we could get a copy of the EPCRA Tier II form or at least find out if other chemicals were at the facility. Do either of you or someone in the Region have that information?

Thanks much and if I can help you in any way, let me know.

Kim
